ARTIST'S IMPRESSION

MASTERPLAN LANDSCAPE DESIGN

In harmony with the leafy park side and harbourfront position, layered greenery extends each home into the natural landscape.

Putney Wharf offers a unique opportunity to create a landmark sanctuary on Sydney's harbourfront. Dangar Barin Smith's landscape architecture blends innovative design, maritime heritage and the natural environment to deliver a truly exceptional residential experience.

Cleverly merging private residential areas with natural beauty, sustainability is emphasised through adaptive reuse and low water use vegetation, incorporating a mix of on-site timber and sandstone, alongside existing mature Fig trees and a rich variety of native plants.

To blend the enclave seamlessly into its surrounding foreshore landscape, larger established greenery on the perimeter gradually scales down to thoughtfully layered native vegetation that wraps each building. This oasis-like atmosphere will intertwine nature with living spaces.

The striking greenhouse-inspired interior space of Halvorsen's and the inviting Putney Wharf Green lawns create an idyllic parkland atmosphere that sets the stage for world-class harbour views.
